

# Screening Eagle extends its growth capital to CHF 60 million for Inspection Tech

## Keynote Screening Eagle product launch event scheduled for September 9<sup>th</sup>, 2020

Zürich, Málaga, and Singapore – September 7, 2020.

**Screening Eagle Technologies (SET), a cloud-based technology platform connecting sensors, software, and data for intelligent inspection of assets and infrastructure, raised CHF 5 million of new capital in an extension of its April 2020 capital raise for a total funding of CHF 60 million.**

The funding, led by a family office with deep industrial technology experience, accelerates Screening Eagle's growth plans in product development, talent acquisition and M&A and supports its mission to protect the built world with software, sensors and data.

"At Screening Eagle we obsess over every detail of inspection; we think over hundred-year asset lifetimes; and we build product solutions that unlock the predictive power of data for field inspectors and engineers to make recommendations and asset owners to make decisions", said Marcel Poser, co-founder and CEO. "We welcome our new investor that shares our long-term perspective and we're excited to unveil our next-frontier developments at our September 9<sup>th</sup> product launch event."

Screening Eagle Technologies has over 220 employees across 9 worldwide offices with R&D technology hubs in Zürich, Málaga and Singapore. Screening Eagle's blue-chip clients inspect the world's most valuable assets – buildings and infrastructure, oil and gas, energy and transportation. Its cloud-connected software platform is transforming the industry; now eclipsing 4,000 registered users.

Screening Eagle is making a major product release announcement on September 9<sup>th</sup>, 2020 – 9am New York | 2pm London | 9pm Singapore – that showcases the power of its Inspection Tech platform.

- Eagle Inspect – *AI-powered intelligent asset inspection software*
- Subsurface Ground Penetrating Radar (GPR) – *mapping the underground world*

**About Screening Eagle Technologies**

Screening Eagle Technologies is a cloud-based technology platform for intelligent inspection of assets and infrastructure. The company was created through the merger of Dreamlab in Singapore and Proceq in Switzerland with a mission to protect the built world with software, sensors and data. Screening Eagle's full-stack inspection solution combines intuitive software and powerful portable sensors to deliver reliable data for construction and asset maintenance decisions. Powered by data from intelligent and autonomous inspection, Screening Eagle is on a steep growth path to realize its vision of predictive healthcare that extends asset life and increases long-term value for asset owners. The Eagle team is creative, innovative and inclusive with a passion for inspection technology that contributes to a world of safe and sustainable assets and infrastructure for all.
